Working Policy

Means of working

The work will be split into sprints of a week's duration with a preparatory meeting each tuesday. Tasks are organized in kanban-boards with an estimated time and responsible person. We will strive to have major programming tasks solved by two members with pair programming.

Report and tests

The report will be written alongside the development of project, right after the implementation in code. Tests will be written preceding major, and in some cases minor, extensions of the project.

Disease

If a group member falls ill during the project period, it is their responsibility to re-delegate their assigned tasks to other members. In case they cannot re-delegate their tasks they must announce their inability to finish their sprint-task to the group as a whole.

Meetings

Each group member strives to work around 20 hours each week on average - physically at ITU tuesdays from 10 a.m. to 4 p.m. and thursdays 12 p.m. to 5 p.m. If more time in-person is needed, the individual group members involved will plan accordingly. Usually on Wednesdays and on the weekends.

Furthermore, we have agreed upon working remotely using Discord on days where we cannot meet up physically or where the scope of the meeting makes this preferable.

How well as a group do you plan to do in this course.

The group has agreed that the main goal will be to fulfil the basic requirements, well. This will allow us to create a robust codebase with modularity to further improve the end-product. We aim to make a product which we can be proud of.

Week-by-week progress plan
